

HARDESTY FAMILY ADAPTIVE SPORTS COMPLEX

The Hardesty Family Adaptive Sports Complex addition more than doubles the size of The Center and provides adaptive sport opportunities for individuals with physical challenges. New amenities allow the facility to maximize sporting events as a U.S. Paralympics Sport Club. A regulation sports court, resistance therapy pool, accessible rooftop terrace, indoor track, adaptive rock-climbing wall, multipurpose spaces, and outdoor sports and therapy spaces allow expanded and enhanced on-site services, including services to physically challenged children and youth. Distinguished signage promotes The Center at the busy 11th and Utica intersection. Ethos has been involved in this project from schematic design to refined renderings for public fundraising and through opening day.
