

SAINT FRANCIS HEALTH SYSTEM WARREN CLINIC OPHTHALMOLOGY

The Warren Clinic's new 4,404 square foot Ophthalmology practice is located on the third floor of the Natalie Building on the Saint Francis Health System Main Campus in Tulsa, Oklahoma.

The practice was built out for a new physician and was designed to easily expand when another physician is brought on board. The design challenge was to provide an efficient layout that still allows for future growth. Exam, procedure, and diagnostic rooms have been designed to accommodate new top of the line Ophthalmology equipment while allowing patients and providers to easily move between the spaces. Warren Clinic's finish standards were incorporated into the space to align the new practice with other Warren Clinic spaces for a cohesive brand experience for both patients and staff.
