

MULTISPORT BUILDING COLLINSVILLE HIGH SCHOOL

The Collinsville HS Multi-sport building is part of a continued masterplan effort that Ethos has been working on with Collinsville Public Schools since early 2018. Our design team analyzed and outline the overall master plan opportunities and include priorities for several new buildings and expansion projects for the initial bond, as well as a subsequent bond, and currently a third bond cycle. This athletic facility includes football locker rooms, wrestling practice facility and locker room, strength training and rehabilitation spaces for multiple sports. The building also offers offices for coaches, trainers, and other staff. This new ground up facility is centrally located between sports fields at the existing high school campus. Our team focused on maximizing space for students, as well as fitting into the context of the campus architecture.

Ethos has completed multiple projects with Collinsville Public Schools and continues to be a partner in new and upcoming projects.
