

BANK OF AMERICA BRANCH LOCATION

BOK, a valued community partner in Tulsa, enlisted our team to reimagine one of their branch banks and adjacent community spaces. Our task encompassed a comprehensive interior remodel, which included updating the teller desk, enhancing security with a secured work room, and modernizing offices while ensuring accessibility and incorporating the bank's branding. Additionally, we designed a versatile training and community room, featuring a locally crafted mural, fostering collaboration and engagement within the community. This project is a prime example of BOK's commitment to serving the community and our dedication to creating functional yet inspiring spaces.
