

FIRST PRYORITY BANK

This 11,200-square-foot bank facility for First Pryority Bank is designed to fulfill the programmatic needs of our local client through a straightforward layout and contemporary design. The main entry welcomes visitors with expansive, light-filled spaces, featuring tall ceilings and maximized glazing for an inviting banking experience.

The facility also features a large drive-through banking area, a structural engineering feat, providing convenience and efficiency for customers who prefer to conduct their transactions from their vehicles. And the upper level includes support offices, meeting spaces, and a breakroom that opens onto an exterior open-air deck, offering a blend of functionality and relaxation, and separating public and private spaces for the staff and customers. Both the exterior and interior designs showcase modern materials and meticulous detailing, ensuring a sleek and professional appearance.

Currently under construction, this state-of-the-art financial facility is slated to open in 2025, promising a new standard of service and aesthetic appeal for the community.
