

SENIOR STAR OFFICE

We designed the Senior Star office in Tulsa, OK, with a focus on fostering collaboration and welcoming visitors and clients, integral to the organization's welcoming culture. The 14,000 square foot office features a large boardroom, a spacious break room where employees enjoy daily lunches, and various casual and formal conference and socializing spaces. Additionally, perimeter offices provide private workspaces for focus and concentration, and the "Jackson Hole" conference room offers a unique touch, reflecting the founding partners' aesthetic taste and heritage. We are honored to help Senior Star create an environment that supports their active service-oriented work focused on seniors and supporting them to remain active and engaged in our community.

“We found Ethos to an extremely collaborative partners that embraced the goals of our renovation, brought progressive ideas to the table and helped us execute in a manner that nailed our goals as well as gave out an office environment that is designed for multiple future generations of associates.”
