

TRI COUNTY TECH DENTAL CLINIC

Ethos Architects partnered with Tri County Tech to enhance and expand their Dental Clinic, creating a more functional and modernized learning environment. The project included enlarging the clinic space to accommodate four additional dental stations, expanding the existing lab and storage areas, and reconfiguring the layout to incorporate two new dental distance learning classrooms.

To support both students and faculty, the renovations also featured an expanded locker room and breakroom, remodeled reception and conference rooms, and the addition of new offices. The entire space was upgraded with state-of-the-art dental equipment and all-new finishes, including flooring, ceilings, lighting, millwork, and fresh paint, ensuring a cohesive and contemporary design.
