

TRI COUNTY TECH COSMETOLOGY

With a fresh remodel, Tri County Tech's updated 7,000 SF cosmetology salon is able to deliver top-notch beauty services to the community. Ethos facilitated the project through all aspects of design including Architecture, Structural Engineering and Interior Design. The renovation involved demolition to complete a new entry vestibule, the addition of multiple salon, manicure, pedicure, facial, waxing and shampoo bowl stations. Additionally, this fresh new look for the salon also came with updated, state-of-the-art equipment for these stations. Tri County Tech's expansion also includes additional classrooms, offices, storage spaces and a new laundry room. The brand-new finishes throughout the studio bring a high-end feel to students, staff and clients. These photos show the cutting-edge salon prior to furniture installation.
