

## GARFIELD S.T.E.A.M. ELEMENTARY SCHOOL

Sand Springs Public Schools needed their 1940's elementary school to meet the district's modern functional and aesthetic standards while honoring the building's historical characteristics. Ethos's design team was faced with the challenge of updating the school's nearly 75-year-old classrooms and infusing them with the newest technology while transforming them into flexible learning environments. Ethos designed a new secure entry to address current student safety concerns. The addition provides a new commercial kitchen, cafeteria seating area, music room, library, four additional kindergarten classrooms, and a hardened space storm shelter. Administrative areas, classrooms, and specialized learning spaces were remodeled. Outdoor spaces were creatively reconfigured to encourage open-air learning and improve playground safety.
