

MCAFEE & TAFT

Oklahoma's largest law firm once occupied the top three floors of Mapco Plaza. Ethos remodeled the space to include state-of-the-art conference areas, updated kitchens and restrooms, and new breakroom and collaboration areas. Upgraded finishes of stone, wood, and natural textures as well as energy-efficient lighting refreshed the space and enhanced the firm's image. When they outgrew that space, they again hired Ethos to design their new offices on the 11th and 12 floors of Williams Center Tower II. We retained the elegant identity of the firm's old offices, infusing the design with modern materials and state-of-the-art technology. We highly value McAfee & Taft and Ethos's continued collaboration.
