

AAON EXPLORATION CENTER

Ethos has partnered with AAON on their new Exploration Center Facility at their headquarters in Tulsa. This 28,000 square foot facility is a state-of-the-art customer center aimed at providing an opportunity for customers to see, test and explore AAON equipment in different conditions via a range of interactive exhibits. This innovative center includes reception, conference and event spaces, catering, offices, retail, support spaces, as well as the featured 10,000 square foot display and exhibit space. The exploration center includes two structural overhead cranes to change equipment and exhibits easily, and even incorporates a balcony overlook from the second-floor conference center. Our Ethos team worked collaboratively on this project to create the project design in an accelerated manner, meeting AAON's goals and providing a sophisticated showroom experience. The project was completed in late winter 2023 and is now open for visitors.
