

ST. JOHN FAMILY MEDICAL CLINIC

Ethos's expertise in healthcare design ensures that medical staff can efficiently function to provide seamless patient care. This facility meets those needs for three groups of users: a residency program for doctors preparing to work in foreign countries while serving disadvantaged patients in Tulsa; a small suite for a non-profit that provides medical supplies and services in the community; and an Urgent Care including 51 Exam Rooms, 5 Procedure Rooms, an X-ray Suite, a Lab with 3 draw stations, a Behavioral Health Suite, Administrative offices, 2 immunization rooms with separate waiting rooms, and a large conference room intended for in-house and community meetings. The facility and site were also designed to accommodate a future 4,000 SF Imaging Center.

Ethos designed a tall roofline and compelling entrance elements to draw in clientele, creating a distinctive look that has been adopted as the signature look for all future St. John Clinics.
