

TRI COUNTY SCHOOL OF BUSINESS & ENTREPRENEURSHIP

As part of our ongoing, ten-year collaboration with Tri County Tech, Ethos designed a large central hub for Tri County's School of Business and Entrepreneurship. Students and faculty are encouraged to work collaboratively through a blend of work environments. The flexible floor plan and furniture can be quickly reconfigured to meet various groups' needs. Study and reading rooms provide quiet spaces. Classrooms in the Learn Lab feature seamless integration of technology which allows an instructor to project at each group's table or gives small groups the ability to work autonomously around independent screens. These spaces double as community space for small-scale events, meetings, and seminars. An Education Accelerated by Service and Technology (EAST)-supportive area features a sound-editing lab, a video room, and a booth-simulation area for students to prepare and practice for competitions. Signage and color schemes carry the school's new branding into each space.
