

UNION PUBLIC SCHOOLS STEM CENTER

To create a budget-friendly and flexible STEM Center for Union Public Schools, Ethos creatively repurposed a former warehouse/showroom space into new classroom space. The innovative lab houses STEM classrooms, a professional learning center, and a "maker" space where students can design and build. Ethos completed the transformation of the space from dated retail to specialized learning spaces. Careful attention was given to all finishes, fixtures, and furniture. The project opened to students in August 2019.
