

TRI COUNTY TECH EMERGENCY SERVICES CLASSROOM BUILDING

This new facility at Tri County Tech supports hands-on training for students pursuing careers in public safety and emergency response. Designed to function in tandem with the existing Burn Tower and Nursing and Emergency Services programs, the building includes three classrooms, an office, break room, locker room, storage areas, and a garage bay sized for a fire truck.

An outdoor classroom extends learning beyond the building, reinforcing real-world training scenarios and collaboration. Together, the spaces provide a flexible, purpose-built environment that prepares students for careers in first response and emergency services.
