

EARLY CHILDHOOD CENTER ADDITION

This new 15,465 SF, ground-up Early Childhood Center for Collinsville Public Schools expands Pre-K capacity with eight classrooms designed to support early learning and development. Ethos provided architectural and interior design services to create age-appropriate, safe, and engaging learning environments, including a motor room, music room, and a hardened storm shelter.

Thoughtfully planned to support both educational and physical development, the new center provides a secure and welcoming setting for young students, staff, and families.
