

NORTH CAMPUS 5TH GRADE CENTER

This new 44,000 SF, ground-up 5th Grade Center for Collinsville Public Schools will be built on a new site to support growing enrollment and evolving program needs. Ethos is providing architectural and interior design services for a facility that includes 16 classrooms, a front administrative office, gymnasium, kitchen, and a hardened storm shelter designed to serve students safely and efficiently.

The project is also planned to accommodate future growth, with site and building planning that anticipates a later expansion to include a 6th Grade Center. Together, the new campus facility supports Collinsville's long-term vision for flexible, student-focused learning environments.
