

## CITY LIGHTS FOUNDATION OF OKLAHOMA

City Lights Foundation of Oklahoma is a nonprofit organization that provides services and programs in the Tulsa area to individuals experiencing homelessness. The City Lights Village will be specifically for the housing insecure and will provide several services, including a financial empowerment center, mental health and addiction resources, and tenant and landlord counseling. Ethos designed the community center facility that provides offices, social spaces, as well as areas for these wraparound services for both residents, clients and community members. Additionally, our team designed a stand alone residential laundry facility on site for residents at another location on the master plan. Both projects are in construction.
