

## NORTH CAMPUS TRANSPORTATION CENTER

This new 7,840 SF, ground-up Transportation Center for Collinsville Public Schools supports district bus and fleet operations with dedicated maintenance and service facilities. Ethos is providing architectural and interior design services for a new building that includes two maintenance bays, a wash bay, fueling station, vehicle storage, and on-site parking.

The facility also includes support spaces for staff, including a break room, office, and conference training room. Designed to improve operational efficiency and long-term fleet maintenance, the new Transportation Center provides a purpose-built solution for the district's transportation needs.
