

SAND SPRINGS PUBLIC SCHOOLS ADMINISTRATIVE BUILDING

Ethos partnered with Sand Springs Public Schools to enhance the functionality and accessibility of the district's existing administration building through a targeted addition and renovation. As a long-standing partner to the district, our team continues to support improvements that better serve staff, visitors, and the broader community.

The project includes a 4,880 SF, four-story entry addition designed to address accessibility challenges created by multiple previous expansions. The work also included demolition of an existing older gym to make way for a more visible and welcoming entry and new parking areas that provide quick access to the administration team. The addition introduces a new elevator, stair access, and a reconfigured entry lobby that improves visibility, wayfinding, and overall user experience. In collaboration with the City of Sand Springs, the parking area and front plaza were designed to be flexible for community-oriented events, strengthening the building's role as a civic hub while supporting the district's daily operational needs.
